

# Bikeability Plus Pilot Project CYCLE LEEDS

## Chosen Modules

**Bikeability Balance** – Reception & Year 1

**Bikeability Primer** – All ages

**Bikeability Fix** – Years 5 and 6

**Bikeability Ride** – Year 6 & families

**Bikeability Transition** – Year 6

**Bikeability Bus** – All ages

Set up - Delivery - Evaluation

## Why B+ ?

- Filling training gaps
- Partnership working
- Staff Development

## Funding

- Costing Challenges
- Impact on Level 1/2

## What we've found so far:

- Schools & instructors excited about Plus modules
- Balance & Primer most popular
- Some Year 5 & 6 modules better at different times of year, busy summer term
- Lots of admin involved in setting up the sessions
- Well supported by Central Bikeability team
- BUS – useful to have instructor who knows area well and local families.

## Case Study – BALANCE

- By far the most popular module!
- Schools like activities for younger children
- Already had a fleet of balance bikes, bought smaller ones with B+ funding.
- 30 children in a day, 5 groups of 6. X1 and 3 sessions.
- links well to PRIMER
